The warehouse was literally blown to pieces and a hole seventy free deep was excavated in the ground by the force of the explosion. It was said that some hodies were thrown into this chasm by the force of the explosion and that they have been cremated.

Owing to the nature of the fire and its dangerous locality the entire force was called out to prevent a spread of the flames to adjoining buildings. Three policemen had been detailed to keep the crowd lack and they were also killed. Many of the spectators were instantly killed aids several were hurled back some distance from the fire and rendered unconsoleds by the force of the shock.

The President's Message Resigning the Office.

PARIS, Jan. 18. The message of M Casimir-Perier to the Senate and the Chamber of Deputies, resigning the office of President of the Republic of France, is as follows.

I have never dissimilated from my said the difficulties of the task which the national assembly imposed upon me. I had foreseen them, but, although one does not refuse, that post in a moment of danger, one only retains the position with dignity under the conviction that he is serving the country. The President of the Republic, deprived of the means of acting, can only find confidence in relumce upon the mation.

Without this his situation is powerless I do not dotbt the good sense and justice of France, but public opinion has been maded. Neither my twenty years devotion to democracy nor my deep attachment to the republic has sufficed to convince all Republicans of the sincerity and ardor of my political faith, nor to disabuse my adversaries who believe, or affect to believe that I will make myself an instrument of their Passions and Their Hopes. Passions and Their Hopes

Passions and Their Hopes.

During the past six months a campaign has been conducted of defamation and insults against the army, the Magistrature, (Here a Socialist shouted, "and rightly.") Parliament and an irresponsible Chief of State. This liberty of fomenting social hatred continues to be called liberty of thought. The respect and ambition I have for the country will not permit me to allow that certain men may every day insult the best servants tor the fatheriand. (At this point the reading was interrupted by loud noises among the Socialist deputies) and he who represents France in the eyest of foreign nations. M. Casimir-Perior's Resignation a Surprise.

L'Aris, Jan. 16. Rents were dealt in on the Equipment this morning at a rate of 75 centines lower than the price at which they were quoted yesterday. Although the regulations forbid street venders from starting out with their wares before eight o'clock in the morning, ha ordinance which frichades the prohibition of the sale of newspapers by criers, the newshoy's were allowed this morning to begin their sales before daybreak. The streets were early filled with yelling boys, whose cries informed many persons for the first time of the resignation of the President.

The announcement came like a thunderbott log thousands of persons, and every one was asking the reason for the President's audden and seemingly unnecessary action. Various reasons were given by the newspapers and none of them seemed to satisfy any great number of the people. Some newspapers declared that M. Casimir Perfer. No Mugwump Advice Wanted The Thibstelphia T = s - says = H n, i U Of complies that the Espain can be added and newspapers are not by justed to accept adver from that classed publications known as Magwamp or gars, and a concludes that Republican pride has been inflated to such a legree by the elections of last year that the party will be sure to take a wrong bended course ending in such a struging defeat as the Democratic party has just sufficial. The Herkly is right in its com-

plaint, but it is wrong in its conclusion. The Republican party is dot disposed to accept advice from the Mugwamp organs breause those organs have so thoroughly discredited themselves as to make their advice and suggestions worthless The Mugwumpa began thele political career with the campaign of 1354 a campaign that was conducted of false pretenses. These men, who were all free traders, recognized that they would not be able to engraft their reve nue principles on the laws of the natiounless they were able to destroy the influence of the late James G. Blaine and prevent his election to the Presi

dency .
Accordingly as the first step in their programme, they began a war of visidea tion on Mr Blaine and made the cam paign of 1884 one of the most unclean in the history of American politics By the aid of the coinseal frauds committed on the ballet box in the South and by the help of John Y. McKune in Gravesend and the Tammany Hall false counters in New York city, they succeeded in defeating the champion of protection and then they began the war on Ameri can indestrius the disastrous effects of

which the nation is now feeling
The fact that they concealed their free trade designs under the mask of persons. vilification would be enough of itself to discredit forever the Magwamps. But it is not the only reason why their advice is not accepted The lack of Judgment and discrimination they showed in selecting the capdidate they would sup-port for the Fresidency and the party with which they would throw in their for is additional cyldence of untrustwor thiness With more than the charley that can be sairly demanded towards Mr. Cleveland, there is not an intelligent fair-minded man in the country who wil claim that the President did not reach the limit of his capacity when he served his county as Sheriff. And yet the Mug. we. 2 amitte Block, Wood Warker Sq. wumpe insisted upop taking

whose record was absolutely black of any pyldences of a study of public questions or of the indesession of those qualimade him their leader in a campaign that was loudly propalmed as a movement for reform and porer politics And, moreover, the Democratic parts, with its pastirecord of incompetency, disunion and unsound financial ideas, was to be used as the idstrument for carrying out

The result that every thoughtful man oresaw would happen when this scheme was fully carried out has come to pass. That the President is lamentably lacking suggestions to the Schator and Representatives from this city concerning the performance of their legislative duties. As the gentlemen named would not have been in their present positions if the longest who were loudest in their praises two years ago, and that the Democratic party in the people of this city has fall and as it is sure to appear the return of the city they have deliked by the results in the people of the city has fall and the this property. uny of them no matter how they dis-tharge their datas even should the ac-cept all of the runerous suggestions, we are of the spin or that they will do just what they consider for the best interests over the spin or that they will do just what they consider for the best interests of the cuts regardless of the warrings of who are more responsible for this coudition of disaster and hamiliation than any others, complain now that their advice and suggestions are not taken by the Republican party. They seem to forget that the captain whose wrong-headed that the capacity whose wrong-to-men as has wricked the ship is not the man whose advice is sported in repairing the damoge

of the income tax. He declared the provision as it came from the House was indefinitely more drastic than that contained in the present law. He mentioned, among other points, the taxation of bavings Banks in the House proposition. Mr Vest sand that he was largely responsible for the form in which the meome tax provision now stood. It did not claim it was perfect or anything like perfect, but asserted that its imperfections were caused by the fact that by the absence of rules in the benate to close debate, the Finance Committee was compelled to put the tariff bill through with whip and spur. The outlier country," he said, "has been clamoring for tariff legislation Those who had charge of the measure—endeavored to make the income tax as objectionable as possible there had been grave defects left in it, but it had been hoped that these defects would be righted in the conference committee. The differences between the House and Senate in relation to the income tax were taken up and referred to Mr McMillin, of Tennessee, and myself, and we worked, night and day for more than a week and flushly come to a copulation. "Just as we succeded in doing so

a tie vote un the question of diecharging the conference committee and the House of Representatives then accepted all the amendments of the Senate to the tariff bill. The condition in which we find ourselves to-day is simply one of the racidents that come naturally from the want of rules in this body."

Mr Vest drifted into a discussion of the rules. He agued that on any political or floaned all measure it was impossible to force action, on other matters any Senator might have almost any bill passed under "Senatorial courtesy." He said the tariff bill passed just year would have been entirely a different mensure it there had been rules in the benate.

how the Prince of Wales Wet Blanketed a Proposed Demonstration The Prince of Wales after four weeks' wandering returned home from Russia looking, for him, very lean but withal hale and fit, as is his customary appear ance There had been some prolimmary ance I here had been some profirminary talk of giving him a great popular wei come, such as that accorded to Lords Beaconsfield and Balbahary when they returned from the Berlin conference bringing with them, as the former dramatically dealered. The according to the conference of th matically declared 'Peace with honor It was suggested that the prince pir formed a service to the country equally great by bringing about a good under standing botween England and Russia Strange to say, the Tory newspapers, from the great Times downward, applauded this sally idea, and olubland set about organizing a demonstration. The prince heard nothing of this until the reached Parls on the way home. Then he telegraphed to Lendon average. Then he telegraphed to London express ing his annoyance at the scheme, which was not only indecorous in view of the sad duties from which he was de-turning, but imputed to him an inter

LANGUAGE FOR MEDICINE

An Italian Suggests That Latin Be Leed.
In All Countries. Decidedly the question of a univer-sal language of medicine is in the air During the last few months we have had occasion to refer to several proposals of the kind. Now comes another,

this time from Italy

Dr. E. Vituli of Bart has addressed a long lotter to the Italian minister of public instruction Dr Baccelli Invit ing him as president of the interna-tional medical congress to propose to the organizing committee that Latin be recognized as one of the official lan recognized as one or the chicks in an guages at the next (Moscow) congress and as the sole official language at all fature congresses beginning with the fourth from the one held this year in

while all medical men have some smat tering of Latin comparatively few know any modern language but their own Very few understand all the languages and at congressa, which hence serve to give an idea of the tower of Bubel as far as confusion of tongree is con-ormed However bid may be then atin speken, it will always, Dr. Vitali main tains be increditigable than any one modern language to the largest number and that after all is the main point for any one roully in earnest in the matter there need be no difficulty in acquiring sufficient fluency in Latin for

SBIST NATURE A WONDERFUL LIGHT It will vive Illumination Fqual to About 150,000,000 Candio Power

The idea of an electric light which fed by a carrent from a dynamic actuat ed by a 40 horsepowdr engine and giving ? 000 candlo power can have its illuminating power intensified 85 000 times is not easy to grasp. It means the projection of a stream of light of about 250 000 000 candle power and it is no wonder that the announcement that such a light is about to be used in this such a light is about to be used to this country has been releaved with some incredulity in Luropd. Yet this is the efficiency of the light which will be shortly erected at Fire island for the illumination of the adjacent coast and the protection of the fleet of ships on

toring New York harbor
A remote suggestion of the power of
this lamp may be arrived at by bearing
in mind that an ordinary oil lamp is about 18 or 40 candle power and then trying to imagine the combined beam of 1 000 000 lumps. The ordinary el c tric street light may be put down at 100 candle power and 250 000 of these would represent the strength of the I ire isl and light

The most powerful oil 1 imp yet in 1 le is supposed to shine out on a ole ir night for a distance of 35 or 40 imiles but the new light will flash its welcome rays to the incoming Luropean liners when they are 120 miles away. The light revolves rapidly and throws out its beams with the intensity of speed of lightning. The metive power which actuates it is a simple clockwork arrangement contained in a box 2 feet square and although the revolving portion of the light weight 15 tons the much union controlling it is so delicate that the pressure of two fingers will turn to The value of this marvelgus lamp can only be diffinited by practical working but it primises to represent an immerse stride in the science of coast lighthe is allumination —I haladely has Press
